

Merlin MELTS Like Magic

PREMIUM ICE MELT

A proprietary blend, Merlin Melts Like Magic® is an effective ice melting blend that dramatically melts more snow and ice than old-fashioned rock salt... just like magic!

For both residential and commercial applications, the brilliant purple color coating is an important safety feature not found in other, more traditional melters.

The coating makes this product highly visible against snow and ice, enabling users to see where it lands and apply additional product accordingly, while alerting passerbys to the presence of an ice melter in use.
